Mobile Application Development - CA1: Review 1

Idea & Proposal Review

Milestone: Problem definition, concept, and project scope

Section	Details
Group Number	To be filled during faculty review.
Team Members	1. Prabhat Kumar 2. Isha Kumari 3. Abhishek Kumar
Title	ReachInbox – Smart Email Management & Automation Mobile Application
App Name	ReachInbox
Problem Statement	Managing emails manually is time-consuming and inefficient. Professionals and teams struggle to track important emails, follow-ups, and campaigns across multiple accounts. ReachInbox provides a focused mobile solution to compose, schedule, automate, and monitor email communication from one place.
Abstract	ReachInbox is a comprehensive email management and automation application. It supports secure authentication, sender account management, email composition, drafts, reusable templates, scheduled emails, campaigns, activity tracking, and campaign controls such as pause, resume, and cancel.
Target Users	Freelancers, professionals, small teams, marketers, small businesses, and users who need to efficiently manage, schedule, automate, and track email communication.
Planned / Implemented Core Features	1. Authentication: Secure signup, login, logout, and session management. 2. Email Management: Compose, send, save/resume drafts, and view email activity. 3. Sender Management: Add, verify, connect, and manage sender accounts. 4. Templates: Create, edit, search, delete, and reuse email templates. 5. Campaigns: Create, start, pause, resume, cancel, and monitor campaigns. 6. Activity: Track email and campaign events through a timeline. 7. Settings: Theme selection, profile/session controls, and application preferences.
Technology / Architecture	Android application with Material 3 UI; Node.js/Express backend; PostgreSQL with Prisma ORM; Redis-backed worker/queue processing; REST APIs with JWT authentication and validation.

Remarks: To be filled during faculty review.

Mobile Application Development – CA1: Review 2

UI/UX Design Review

Milestone: Wireframes, mockups, screenshots, and visual design language

Section	Details
Group Number	To be filled during faculty review.
Team Members	1. Prabhat Kumar 2. Isha Kumari 3. Abhishek Kumar
Title	ReachInbox – Smart Email Management & Automation Mobile Application
App Name	ReachInbox
Screens Designed	Splash, Login, Signup, Dashboard, Compose Email, Campaigns, Campaign Details, Senders, Templates, Scheduled Emails, Activity, Settings, More, and supporting detail/create screens.
Design System	Material 3 component system with an Indigo/Purple primary identity, Slate/neutral surfaces, semantic Success, Warning, Error and Info states, consistent 4dp/8dp spacing, readable typography, standardized icons, outlined cards, and purpose-specific Filled/Tonal/Outlined buttons.
Navigation & UX	Five primary destinations: Dashboard, Emails, Campaigns, Activity, and More. Authentication and secondary screens use appropriate navigation visibility. Drafts resume directly in the composer. Empty states guide users toward the next action.
Feedback & Interaction	Professional Material 3 Snackbars and confirmation dialogs replace generic Toast feedback. Loading, error, success, destructive actions, and campaign state changes use clear visual and contextual feedback.
Responsive / Accessibility Focus	Consistent margins, padding, touch targets, contrast-aware text, non-overlapping layouts, keyboard-safe forms, and clear hierarchy are applied across the application.

Actual Application Screenshots

Login Screen | **Create Account / Signup Screen**

Reference Wireframe / Mockup

Sample Wireframes / Mockups

The original wireframe is retained as a design reference; the Login and Signup sections above use actual application screenshots.

Evaluation – UI Design & Visual Appeal

Mobile Application Development – CA1: Review 3

Development & Responsiveness Review

Milestone: Core build progress and responsive layout implementation

Section	Details
Group Number	3
Team Members	1. Prabhat Kumar — 25MCAR0110 2. Isha Kumari — 25MCAR0098 3. Abhishek Sharma — 25MCAR0086
Title	ReachInbox – Smart Email Management & Automation Mobile Application
App Name	ReachInbox
Features Implemented	1. Authentication: Secure signup, login, logout and session management. 2. Email Management: Compose, send, save/resume drafts and scheduled emails. 3. Sender Management: Add, verify, connect and manage sender accounts. 4. Templates: Create, edit, search, delete and reuse email templates. 5. Campaigns: Create, start, pause, resume, cancel and monitor campaigns. 6. Activity: Track email and campaign events through a timeline. 7. Settings: Theme selection, session controls and application preferences.
Tech Stack Used	Android Studio with Java, XML, AndroidX, Material 3, Navigation Component, Retrofit, OkHttp and Gson; Node.js/Express backend; PostgreSQL with Prisma ORM; Redis and BullMQ for queue/worker processing; REST APIs with JWT authentication and validation.
Devices / Screen Sizes Tested	Android physical smartphone and Android Studio emulator; portrait layouts; different Android screen densities and small/large mobile screen dimensions.
Responsive Design Approach	Responsive Android layouts using ConstraintLayout, LinearLayout, ScrollView/NestedScrollView where required, RecyclerView for dynamic lists, dp for dimensions, sp for typography, wrap_content/match_parent and Material 3 components. Forms are keyboard-safe and adapt to different screen sizes.
Known Issues / Bugs	Minor visual adjustments may be required after testing on additional physical devices. Local network configuration is required when the Android device connects to the development backend.
Add-ons as per Remarks	Material 3 UI refinement, Indigo/Slate theme; improved typography, spacing, margins and alignment; standardized cards/buttons; loading, empty and error states; Snackbar feedback; improved dark mode; refined bottom navigation; campaign progress visualization; sender connection status; and improved form usability.

Evaluation – Responsiveness & Interactivity:
Remarks: To be filled during faculty review.

Mobile Application Development – CA1: Review 4

UX, Navigation & Usability Testing

Milestone: User flow, interactivity, and usability feedback

Section	Details
Group Number	3
Team Members	1. Prabhat Kumar — 25MCAR0110 2. Isha Kumari — 25MCAR0098 3. Abhishek Sharma — 25MCAR0086
Title	ReachInbox – Smart Email Management & Automation Mobile Application
App Name	ReachInbox
Navigation Flow Summary	Primary navigation: Dashboard → Emails → Campaigns → Activity → More. More contains Drafts, Senders, Templates, Settings, About and Logout. Secondary screens use appropriate back navigation.
Interactive Components Used	Buttons, text fields, password fields, search bar, RecyclerViews, cards, navigation bar, toolbar, dialogs, Snackbar notifications, status badges, progress indicators, menus, theme selection, confirmation dialogs, loading indicators, empty states, error states and retry actions.
Usability Testing Method	Team member testing, peer testing, repeated navigation through major application flows, authentication testing, email composition, sender management, campaign management, template management, light/dark theme testing and physical-device testing.
Usability Feedback Received	Testing identified the need for simpler primary navigation, clearer sender connection status, user-friendly error messages, useful empty states, clearer campaign progress, consistent form spacing/alignment, stronger action hierarchy, improved dark-mode contrast and confirmation for destructive operations.
Navigation Improvements Planned	Verify complete navigation, back navigation, authentication flow, campaign state transitions, compose/resume flow, sender verification, template integration, logout behavior, error recovery and device responsiveness before final submission.
Add-ons as per Remarks	Primary bottom navigation reduced to five destinations; secondary features grouped under More; clearer sender states; improved authentication messages; proper empty/loading/error states; confirmation dialogs; standardized buttons and inputs; campaign progress indicators; improved themes; professional Snackbar feedback; and improved back-stack behavior.

Evaluation – User Experience & Navigation:
Remarks: To be filled during faculty review.

Mobile Application Development – CA1: Review 5

Final Presentation & Deployment Review

Milestone: Completed app, deployment, and final demo

Section	Details
Group Number	3
Team Members	1. Prabhat Kumar — 25MCAR0110 2. Isha Kumari — 25MCAR0098 3. Abhishek Sharma — 25MCAR0086
Title	ReachInbox – Smart Email Management & Automation Mobile Application
App Name	ReachInbox
Deployment Details	Platform: Android. Build: Android APK. The Android application communicates with a Node.js/Express REST API. Backend uses PostgreSQL, Prisma, Redis, BullMQ, Docker and Docker Compose. APK will be provided for demonstration/submission.
Final Feature Summary	User authentication; email composition and sending; drafts; scheduled emails; sender management and SMTP verification; reusable templates; campaign creation and recipient management; campaign scheduling/start/pause/resume/cancel; campaign progress/completion tracking; activity timeline; Material 3 UI; Light/Dark/System themes; responsive layouts; status badges; loading/empty/error states; Snackbar feedback and confirmation dialogs.
Demo Notes	1. Signup → Login → Dashboard. 2. Dashboard metrics, activity and navigation. 3. Add and verify sender. 4. Compose and send an email. 5. Save and resume a draft. 6. Create/edit/use a template. 7. Create campaign, add recipients, start/schedule and demonstrate progress/state controls. 8. Show activity timeline. 9. Demonstrate Light/Dark/System themes and UI states.
Project Report Submitted	Yes — final project report/documentation will be attached/submitted as required.
App Icon	ReachInbox application icon.
Add-ons as per Remarks	Refined UI/UX; consistent Material 3 design; improved navigation; responsive layouts; Light/Dark/System themes; accessibility improvements; improved error handling; loading/empty/error states; campaign progress tracking; sender connection status; template integration; confirmation dialogs; Snackbar feedback; improved typography and spacing; consistent alignment; and production-oriented visual design.

Final Evaluation – CA1 Rubric Total 15 Marks
Remarks: To be filled during faculty review.
